

Title	Model codes of safe practice - Part 2 Design, construction and operation of distribution installations (ISBN 978 0 85293 383 1)
Publisher/Author	Energy Institute
Publication Date	2005
Scope	<p>Essential reading for operations, engineering and project managers, designers, safety advisers and all those involved in the safe and efficient design, construction, operation and decommissioning of petroleum distribution installations.</p> <p>This new publication replaces the second edition of IP2, published in 1998. Its purpose is to provide a general guide to safe practice in the layout, design, construction and operation of distribution installations and their equipment. The Code aims to recommend basic standards and practice in this regard.</p> <p>The new edition covers the receipt, storage and handling of petroleum products at all locations, and should be read in conjunction with the UK Health and Safety Executive's publications HS(G)51 The storage of flammable liquids in containers, HS(G)176 The storage of flammable liquids in tanks and HS(G) 186 The bulk transfer of dangerous liquids and gases between ship and shore, or their local equivalent in other countries.</p>
