

Title	EHS21: Asset Integrity Toolkit
Publisher/Author	UKOOA
Publication Date	2006
Scope	<p>In support of Asset Integrity Inspections undertaken by the Health and Safety Executive, UKOOA established the Installation Integrity Working Group (IIWG) in 2004.</p> <p>This work group helped develop and collate a collection of good practice techniques and guidelines to assist operators in their efforts to maintain and enhance asset integrity.</p> <p>The Asset Integrity Toolkit provides a practical framework of “observed good practice”, checklists and tools to facilitate and enable review of Asset Integrity Management throughout the “Six Stages of the Lifecycle” of any offshore installation.</p> <p>Asset Integrity Lifecycle Checklist</p> <p>The Asset Integrity Lifecycle Checklist identifies the various elements of each of the integrity tools contained within the Asset Integrity Toolkit and the various stages of the integrity lifecycle. In order to achieve best practice, each of the elements should be considered against each stage of the lifecycle and any deficiencies addressed.</p>
